

Senti Bio to Participate in Chardan's 6th Annual Genetic Medicines Conference

September 20, 2022

SOUTH SAN FRANCISCO, Calif., Sept. 20, 2022 (GLOBE NEWSWIRE) -- Senti Biosciences, Inc. (Nasdaq: SNTI) ("Senti Bio"), a biotechnology company innovating next-generation cell and gene therapies using its proprietary gene circuit platform, today announced that co-founder and CEO, Tim Lu, CFO, Deb Knobelman, and CMDO, Kanya Rajangam will participate in a Fireside Chat at the Chardan's 6th Annual Genetic Medicines Conference on Monday, October 3, 2022, at 1:30 PM ET. Tim Lu will also participate in a panel on Gene Regulation on Tuesday, October 4, 2022, at 9:30 AM ET.

A live webcast of the Fireside Chat can be accessed under the [Events & Presentations](#) section of the Senti Bio website under the Investors tab and will be available for 120 days following the presentation.

About Senti Bio

Our mission is to create a new generation of smarter medicines that outmaneuver complex diseases using novel and unprecedented approaches. To accomplish this, we are building a synthetic biology platform that may enable us to program next-generation cell and gene therapies with what we refer to as Gene Circuits. These Gene Circuits, which are created from novel and proprietary combinations of DNA sequences, are designed to reprogram cells with biological logic to sense inputs, compute decisions and respond to their cellular environments. We aim to design Gene Circuits to improve the intelligence of cell and gene therapies in order to enhance their therapeutic effectiveness, precision, and durability against a broad range of diseases that conventional medicines do not readily address.

Our synthetic biology platform utilizes off-the-shelf chimeric antigen receptor natural killer (CAR-NK) cells, outfitted with Gene Circuit technologies, to target particularly challenging liquid and solid tumor oncology indications. Our lead development candidate is SENTI-202 for the treatment of acute myeloid leukemia (AML). Additional CAR-NK programs include SENTI-301 for the treatment of hepatocellular carcinoma (HCC) and SENTI-401 for the treatment of colorectal cancer (CRC). We have also demonstrated the breadth of our Gene Circuits in other modalities and diseases outside of oncology and have executed partnerships with Spark Therapeutics and BlueRock Therapeutics to advance these capabilities.
