

## Senti Bio Announces Multiple Data Presentations at the American Society of Gene and Cell Therapy 2023 Annual Meeting

- Four abstracts accepted show the potential of applying gene circuits in multiple cell and gene therapy modalities for neurology, ophthalmology, and oncology -

- New preclinical data demonstrate ongoing progress from collaborations with BlueRock and Spark -

SOUTH SAN FRANCISCO, Calif., May 02, 2023 (GLOBE NEWSWIRE) -- Senti Biosciences, Inc. (Nasdaq: SNTI) ("Senti Bio"), a biotechnology company innovating next-generation cell and gene therapies using its proprietary Gene Circuit platform, today announced two oral presentations and two poster presentations at the American Society of Gene and Cell Therapy (ASGCT) Annual Meeting, being held May 16-20, 2023, in Los Angeles, CA.

"The abstracts accepted for presentation at ASGCT illustrate the potential and modularity of Senti's gene circuit platform," said Timothy Lu, MD, PhD, Chief Executive Officer and Co-Founder of Senti Bio. "Our presence at such an important venue this year represents tremendous progress in our wholly-owned and partnered programs, and underlines the incredible work from our research team. The work that will be presented validates the applicability of Senti's technology in modifying a wide range of cells, including NK cells, T cells, AAVs and stem cells, using both viral and non-viral techniques, for a variety of indications including neurology and ophthalmology."

Information about the oral presentations and the poster sessions is as follows:

### **Oral Presentations**

**Engineering pharmacologically relevant, FDA-approved small-molecule-regulated gene circuits for therapeutic applications in the brain**  
*In collaboration with BlueRock Therapeutics*

**Abstract Number:** 150

**Location:** Room 502 AB

**Date and Time:** May 18, 2023, 3:00 p.m. - 3:15 p.m. PT

**Massively parallel and systematic engineering platform for highly compact, cell-type specific, and potent Smart Sensor promoters for precision retinal gene therapies**

*In collaboration with Spark Therapeutics*

**Abstract Number:** 341

**Location:** Room 502 AB

**Date and Time:** May 20, 2023, 8:15 a.m. - 8:30 a.m. PT

### **Poster Presentations**

**High-throughput engineering of Logic Gated-gene circuits for precision CAR cell therapies**

**Abstract Number:** 1408

**Session Title:** Friday Poster Session

**Date and Time:** May 19, 2023, 12:00 p.m. PT

**Designing cell-state-specific synthetic promoters as Smart Sensors to control macrophage polarization**

*In collaboration with BlueRock Therapeutics*

**Abstract Number:** 1535

**Session Title:** Friday Poster Session

**Date and Time:** May 19, 2023, 12:00 p.m. PT

Following the presentations, copies of the oral presentations and posters will be available on the [Scientific Presentations & Publications](#) section of the Senti Bio website.

### **About Senti Bio**

Our mission is to create a new generation of smarter medicines that outmaneuver complex diseases using novel and unprecedented approaches. To accomplish this, we are building a synthetic biology platform that may enable us to program next-generation cell and gene therapies with what we refer to as Gene Circuits. These novel and proprietary Gene Circuits are designed to reprogram cells with biological logic to sense inputs, compute decisions and respond to their cellular environments. We aim to design Gene Circuits to improve the intelligence of cell and gene therapies in order to enhance their therapeutic effectiveness, precision, and durability against a broad range of diseases that conventional medicines do not readily address.

Our synthetic biology platform utilizes off-the-shelf chimeric antigen receptor natural killer (CAR-NK) cells, outfitted with Gene Circuit technologies, to target particularly challenging liquid and solid tumor oncology indications. Our lead product candidate is SENTI-202 for the treatment of CD33 and/or FLT3 expressing hematologic malignancies, such as acute myeloid leukemia (AML) and myelodysplastic syndromes (MDS). Additionally, our SENTI-401 program is being designed for the treatment of colorectal cancer (CRC) and other CEA-positive cancers. We have also demonstrated in preclinical studies the potential breadth of our Gene Circuits in other modalities, including T cells, adeno-associated viruses (AAVs) and induced pluripotent stem cells (iPSCs), and diseases outside of oncology; and we have executed partnerships with Spark Therapeutics and BlueRock Therapeutics to advance these capabilities.

### **Forward-Looking Statements**

This press release and document contain certain statements that are not historical facts and are considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements generally are identified by the words "believe," "could," "predict," "continue," "ongoing," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," "forecast," "seek," "target" and similar expressions that predict or indicate future events or trends or that are not statements of historical matters. Forward-looking statements are predictions, projections, and other statements about future events that are based on current expectations of Senti Bio's management and assumptions, whether or not identified in this document, and, as a result, are subject to risks and uncertainties. Forward-looking statements

include, but are not limited to, Senti Bio's release of additional preclinical data. These forward-looking statements are provided for illustrative purposes only and are not intended to serve as and must not be relied on by any investor as, a guarantee, an assurance, a prediction, or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of Senti Bio. Many factors could cause actual future results to differ materially from the forward-looking statements in this document, including but not limited to: (i) changes in domestic and foreign business, market, financial, political and legal conditions, (ii) changes in the competitive and highly regulated industries in which Senti Bio operates, variations in operating performance across competitors, changes in laws and regulations affecting Senti Bio's business, (iii) the ability to implement business plans, forecasts and other expectations, (iv) the risk of downturns and a changing regulatory landscape in Senti Bio's highly competitive industry, (v) risks relating to the uncertainty of any projected financial information with respect to Senti Bio, (vi) risks related to uncertainty in the timing or results of Senti Bio's preclinical studies, IND filings, and GMP manufacturing startup activities, (vii) Senti Bio's dependence on third parties in connection with preclinical and IND-enabling studies, IND filing, and GMP manufacturing buildout and startup activities, (viii) risks related to delays and other impacts from the COVID-19 pandemic, and (ix) the success of any future research and development efforts by Senti Bio. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the "Risk Factors" section of Senti Bio's registration statement on Form 10-K, filed with the SEC on March 22, 2023, and other documents filed by Senti Bio from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements in this document. There may be additional risks that Senti Bio does not presently know, or that Senti Bio currently believes are immaterial that could also cause actual results to differ from those contained in the forward-looking statements in this document. Forward-looking statements speak only as of the date they are made. Senti Bio anticipates that subsequent events and developments may cause Senti Bio's assessments to change. Except as required by law, Senti Bio assumes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events, or otherwise.
